**AUTOMATIC PENCILS.**

Realite is an entirely new invention in the pencil world. It is the most important development in pencil making in many years.

The barrels of Realite pencils are not made of wood or metal, but of Redmanol. Redmanol is a hard, durable composition as light as wood and more beautiful than hard rubber. It will not chip, crack, warp or discolor.

The simplest mechanism known is used in Realite pencils. It would seem impossible to simplify them. Even school children quickly learn to use them. In the class room and the office they promote efficiency.

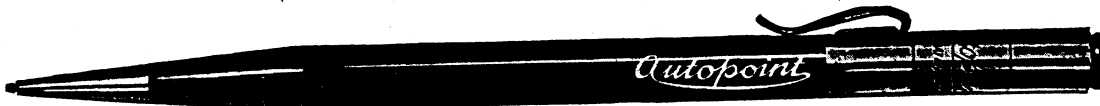

Perfect in balance, elegant in appearance, simple in construction—Realites are the ideal pencils.

They are furnished in green, black, maroon and mottled colors. The tips are finished in realex metal or gold. Each is equipped with a full size red eraser and extra leads.

Guaranteed to give complete satisfaction, or your money refunded. Packed one dozen in a box, in assorted colors.

With Gold Filled Tips .....		
Extra Leads, per box with two erasers .....		

Autopoint "Standards" combine all the best points of wood and mechanical pencils. Absolutely no objectionable features. They are light, quick, convenient and perfectly balanced. The hand grips a highly polished wood exterior—the mechanism is simple and trouble-proof. No other mechanical pencil can be refilled as quickly and as easily, as the Autopoint.

**Rush E-Eraser.** Made of metal tubing, gold plated, with a mineral brush that cuts like a diamond. A letter from a word or figure from a column is instantly removed. Has screw cap which controls movement of the mineral brush. This eraser will last a life time, as holder is indestructible and the eraser brushes can be replaced. Each \$

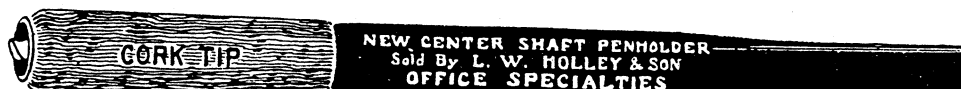

Refills for above..... Each

**Bee Gee.** A perfect ink eraser, constructed on an entirely new principle. The eraser has a brush of extreme delicacy and very hard, encased in a heavily nicked solid brass holder 4 inches in length and the thickness of a fountain pen. The brush is made to protrude by turning the cap, and a few strokes of the brush remove the ink mark, leaving the paper smooth. When the brush wears out another one can be inserted. .... Price complete \$

**New Action**

**DAVIS AUTOMATIC INKSTANDS.**

**ECONOMY IN THREE CLASSES.**

**Saving of Ink, Saving of Time and Saving of Pens.**  
 Saving of Ink, which will more than pay for the inkstand each year.

**Saving of Time**, because it requires cleaning and filling only at intervals of two to twelve months; furthermore, convenience in use saves 10% to 25% of average writing time, compared with all other types of inkwells.

**Saving of Pens**, because ink remains limpid, and will not crust nor corrode the pen so quickly, and there is no bother from dauby, thick ink. Experience has proven that pens last twice as long with this as with other inkwells.

**PERFECT INKING OF THE PEN.**

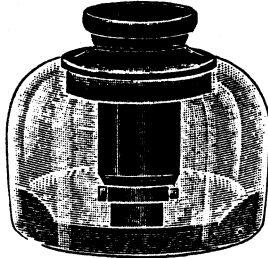

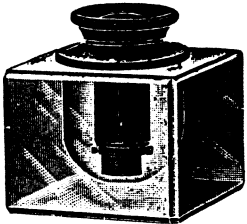

Positive, direct inking of the pen, not merely wetting it—and there is a big difference.

**PURE INK.**

The ink is taken from the center of the fluid at each dipping of the pen, thus avoiding the scum and lint that accumulated on the top of the ink in the open stand, and the evaporation being done away with, the ink is kept pure until it is all used.

**CONVENIENCE.**

Convenience alone makes the Davis Automatic worth all you pay for it.

- No. 593 Cut Glass, 3" sq. \$
- 93 Plain Glass, 3" sq.
- 593 1/2 Cut Glass, 3 1/2" sq.
- 594 Cut Glass, 4" sq.
- 595 Cut Glass, 5" sq.

- No. 500 Plain Glass, 3" rd. \$
- 503 Plain Glass, 3 1/2" rd.

All moving parts below top of well—no funnels above top to cause accidents—no splashing or spurting.

Operation the same whether full of ink or nearly empty, without any adjustment, as plunger is always kept in position by a 12-karat gold-filled spring which is inside the plunger away from contact with ink. No soft rubber discs to wear out.

Easy to clean, as parts may be separated by simple finger pry, without tools.

A Davis Automatic will last a life-time, and not only pay 100% dividend in saving of ink, but another 100% or more in saving of time, every year.

Black top for black ink is furnished unless otherwise specified. Red top for red ink can be furnished if desired.

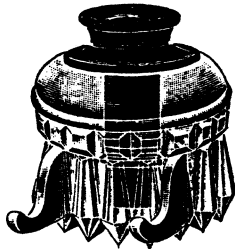

**DUST CAP.**

Dust cap is not included in price of Inkstands or Sets.

Adds somewhat to the appearance, and prevents dust or dirt collecting on top of Inkstand when not in use.

Specify if wanted.

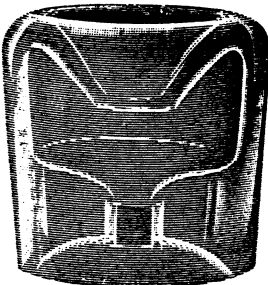

Each.....\$

- No. 505. As shown, 3".....\$
- 502. Without pen racks.

**PRESSED GLASS INKSTAND.**

**KELLER'S SUPERIOR INKS.**

**KELLER'S WRITING FLUID.**

For ordinary bank, office and general use. It writes a beautiful blue. As it dries it penetrates deeply into the paper and changes to a dense and permanent black. The most perfect chemical ink, does not change color in the inkstand and never gums the pen. An ink we recommend for all general uses. All bottles have patent pour out tops. It is also an excellent fluid for fountain pens.
